MANY WANT TO TAKE CENSUS

One Hundred and Eleven People After Jobs in Highland County.

TEN WOMEN APPLICANTS

Full List of Those Who Took the Examination Saturday and the Townships in Which They Live.

Ninety-six people from different sections of the county assembled at the Washington school building last Saturday morning for the purpose of determining whether or not they were competent to serve as Census Enumerators.

Among the number were ten ladies, who seemed to enter into the contest with a zeal, that betokened success. From ten a. m. until three in the afternoon, most of the applicants toiled with the perplexing test submitted to them. Some of them, less fortunate than the others, gave up in despair and left the building before completing the examination.

There were 112 cards issued to applicants by Mr. Mitchell, but for some unknown cause sixteen of them failed to put in an appearance for the test. An examination was also held on the same day at Greenfield which was attended by fifteen people from Greenfield, and Fairfield and Paint townships, making a total of 111 people who took the test in Highland county or an average of about 4 applicants for each position to be filled.

Below is a list of all those who took the examination at Hillsboro.

FARMERS' INSTITUTE

Opened With Good Attendance Yesterday in Spite of Bad Weather.

GOOD ADDRESSES MADE

Many Questions are Asked Speakers by Audience and "Question Box" Proves an Interesting Feature.

Although the rain was pouring down in torrents, about 200 people were present at the opening session at the Farmers' Institute yesterday morning and towards noon several more kept coming in so that by the close of the forenoon session the Opera House was comfortably filled with an intelligent and interested audience.

Following the invocation and music C. W. Montgomery gave a splendid talk on Clover and Alfalfa, which was well received. At the close of his address several questions were asked concerning certain kinds of Clover and Alfalfa and their growth and were answered to the satisfaction of the inquirers.

J. W. Overman being absent his subject was omitted and Frank Blackford handled his subject of "Commercial Fertilizers" in a masterful manner showing that his mind was a regular store-house of facts concerning fertilizers.

This able talk was followed by another on the subject of "The Function of Lime in the Soil" by Charles E. Thorne. Many of the farmers, who were anxious to learn better methods of farming and an adaptation of particular crops to certain kinds of soil, plied the speakers with questions and received many useful suggestions if carried out.

Just before the close of the session President H. M. Brown announced the following committee on resolutions: C. N. Pulse, A. H. Smith and R. R. West.

The afternoon session opened promptly at 1 o'clock with music by the Etude Quartette. Prof. Thorne delighted the audience again in the afternoon on the subject of "Some Fundamental Principles in Fertility Maintenance."

Mr. Montgomery spoke in an entertaining manner on "How Plants Feed and Grow." After the close of these talks many interesting questions were asked and answered.

The night session proved to be the most interesting of all. The "Question Box" in charge of C. C. Muhlbach proved to be an exceedingly interesting "box." The questions asked provoked a general discussion with each one contending that he had the proper solution for the information wanted but in the main all received suggestions that will be helpful to them. The ladies are taking an unusual interest in the proceedings and will have their inning this afternoon when Poultry Raising will be discussed by them.

MAYOR ORDERS DOGS MUZZLED

For Thirty Days, as Dog Which Recently Died Found to be Mad.]

HAD BITTEN OTHER DOGS

Un-Muzzled Dogs at Large Will be Killed by Officers as Precaution Against Hydrophobia.

The examination of the head of the dog of Mrs. Frank Durnell that was sent to the State Veterinarian at Columbus for examination was found to have had rabies.

The dog had acted very queerly for several days before its death and had had fights with several other dogs before it was confined.

To prevent any possible danger from dogs that were bitten by this dog, Mayor Nesbit has issued a proclamation ordering that all dogs that are allowed to run at large to muzzled for the next thirty days, and that any unmuzzled dogs found at large during that time shall be killed by the officers.

On Monday Dr. S. R. Howard received the following letter from State Veterinarian Paul Fischer, who examined the head of the dog.

Dr. S. R. Howard, Hillsboro, Ohio.

Referring to yours of the 26th ultimo. The results of the examination of the dog's head sent by you indicated that the animal in question had rabies.

Very truly yours, PAUL FISCHER, State Veterinarian.

The proclamation of the mayor is as follows:

TO OWNERS OF DOGS.

A dog which was killed recently in the village was declared by the State Veterinarian to be afflicted with rabies. This dog was known to have bitten a number of other dogs.

It is, therefore, ordered that the officers shall take up and kill all dogs that may be found running at large for the next thirty days unless they are securely muzzled.

HENRY NESBIT, Mayor.

If a healthy dog is bitten by a mad dog the first symptoms of the disease, if infection occurred, will appear in about three to six weeks after the infliction of the bite. Sometimes, however, the time is shorter and on the other hand it may be longer.

The dog, which had the rabies here, bit the other dogs about January 22 to 24, a little over two weeks ago, so that the greatest danger of the disease breaking out in them will be within the next few weeks, and every precaution should be exercised by all owners of dogs.

There is no more terrible disease than hydrophobia, a person having it suffering untold agonies and it is almost always fatal.

The order of the mayor should be carefully observed by all owners of dogs, and if they do not wish to muzzle their dogs should see that they are closely confined. The officers will kill any and all dogs that are found at large unmuzzled within the next thirty days. Too much precaution can not be exercised under conditions of this kind, and Mayor Nesbit is to be commended for his prompt action.

Mr. and Mrs. Frank Hudson, of Cincinnati, are visiting Mr. and Mrs. L. F. Boulware.

Many mixtures are offered as substitutes for Royal. None of them is the same in composition or effectiveness, so wholesome and economical, nor will make such fine food.
